**Subject:** Please Respond: ERT/SERAS-NY State Radiological Site Geo Probe Soil Sampling  
[NFB QAPP DRAFT Compiled.pdf](#)  
[CRU Addendum QAPP\\_051314-signed.pdf](#)

Good Afternoon:

We have upcoming Geo Probe soil sampling to perform at the three NY State Radiological Sites I am currently sampling. Instead of Weston subcontracting the Geo Probe work I am looking into the feasibility of ERT/SERAS assisting.

We would want to mirror the QAPP and sampling procedures Pre-Remedial used during their assessment of these properties (QAPP documents attached).

Info about the dates and my tentative notes to Weston are below. Please let me know. Thanks

### **Canadian Radium & Uranium Site:**

- We will be mobilizing to the Site on August 3<sup>rd</sup>.
- **4 Weston Technicians needed this week.**
- The Radon Specialist schedule will be Monday & Tuesday drop off and Thursday & Friday pick up.
- Radon Canister numbers should be 75-90. I am hoping to get a better idea from Dan.
- Geo Probe Soil Boring Sampling-At this point we have not been

given any further information on this from Dan or the Health Physicists but the tentative plan is to take at least 5 soil boring samples this week

- Please let me know the status of the Reuter Stokes 131 PIC (RSS-131 PIC) rental. We are hoping to get one by Tuesday in order to have a training on Wednesday with Oleg in the Edison Office. We will need this instrument (Like the Rad7 Units) until we finish the three assessments.

### **Holy Trinity & Niagara Falls Boulevard Sites:**

- We will be mobilizing to the Sites on August 10<sup>th</sup> **with a travel day on August 9<sup>th</sup>**. Due to the Radon Specialist and deploying of the canisters at both sites, we need to be there first thing Monday morning.

- We should only need **two Weston Technicians** for this week's work.

- The Radon Specialist schedule will be Monday & Tuesday drop off and Thursday & Friday pick up.

- Ben can correct me but I believe we are looking to deploy 75 canisters at Niagara Falls Boulevard and 12 at Holy Trinity.

- We will definitely need to conduct soil boring sampling. About 20 samples.

- We still have some property boundary issues to work through since we got the parcel information today. It doesn't appear that we need have the metes and bounds survey.

Regards,

Eric
